

# EVOLUTION BLUE™

Affordable  
high-pressure  
fogging fans to  
manage  
heat stress.

Reduces air  
temperature up  
to 30°F!

- 24" and 30" models.
- Oscillating and non-oscillating.
  - Made in the USA.
  - 120 volt models only.

#### Ideal For:

Outdoor patios, sports activities,  
warehouses, garages,  
zoos, cookouts, pools,  
concerts, horse stables,  
outdoor weddings, greenhouses,  
receptions, amusement parks,  
special events, construction sites  
or any location that needs  
relief from the summer heat.

## Keep it Cool!

The Schaefer Evolution Blue™ Systems are the ultimate high-pressure fogging fans on the market that can reduce the ambient air temperature by as much as 30 degrees, providing the ultimate benefit of coolness without wetness.

At the heart of the EB24 & EB30 Evolution Blue™ cooling system is a specially designed high-quality high pressure pump that provides 800-1000 PSI at very low flow rates. The system also allows for two satellite units to be attached to the main unit. This is a high-pressure line with quick-connects. Its oscillating fan provides the necessary forced air velocity to evaporate the "fog" generated by the high-pressure pump.

#### Specifications:

**Pump:** .75 GPM, 3/4 Hp industrial CAT™ pump. Automatic low-pressure shutoff. Pump will not run without water pressure. 1000 PSI with 5 micron filter. Operating system required standard 110 electricity and a standard garden hose.

**Misting Ring:** Stainless steel with eight - .008 anti-drip stainless/brass nozzles on the EB24 and ten - .008 nozzles on the EB30.

**Fan:** High performance industrial 24 or 30 inch oscillating fan with three speeds. Totally enclosed motor, permanently lubricated split capacitor. UL 507 outdoor rated fan.

**Satellite Fans:** A satellite is a fan equipped with a misting ring and connects to the main fan unit. Our satellite fan will look much like the master unit without the pump and enclosure. The Evolution Blue™ has two extra quick-connect ports to run one or two satellite fans.

**Water Supply:** Standard garden hose with at least 15 pounds of water pressure.

**Assembly:** Some assembly is required using basic hand tools.

#### Models Available:

**EB24:** 24" Fan Base Unit with Pump

**EB30:** 30" Fan Base Unit with Pump

**EB24-SAT:** 24" Satellite

**EB30-SAT:** 30" Satellite
