

Redesigned for 2011!

VersaMist

The VersaMist® portable “person cooler” combines fine mist and high speed air movement for personnel cooling indoors and out.

Simply fill it up, plug it in, turn it on, and chill!™

PVM18C

For 2011, Schaefer has redesigned the VersaMist® for increased convenience and durability at a much lower price. The new PVM18 has a redesigned tank for easier assembly and transport but retains all the features you love, including a 10 gallon/5-hour tank capacity, a 3-speed, outdoor rated fan (available in white or black), the choice of mist plus air or air only cooling, and safety features including GFI and tip-switch disconnect. The new PVM18C now has a 14 gallon/7 hour tank capacity, built-in rubber wheels and a retractable pull handle for easy transport and the same fan and safety features as the PVM18.

Both VersaMist® models are great for cooling work areas, special events, patios, or sidelines, when limited electricity and no running water is available.

Heat can be a major problem on many job sites, resulting in worker fatigue, low morale, decreased productivity and the risk of heat stress. Schaefer's VersaMist® misting fans are a great way to beat the heat.

SPECIFICATIONS

Power: 115 volts, 2.2 amps

PVM18C (VersaMist with wheels and pull handle)

- 3-speed UL507 certified outdoor rated fan.
- 14 gallon tank and pump and fan assembly
- 7 hour water tank capacity
